

# A Quick Guide On How to Type the Shrug Emoji 🙄

Emojis may be all the rage right now, but typed emoticons can still be a fun way to insert personality in online chats. Typed emoticons make us all feel nostalgic for easier times, when phones still had physical keyboards. Those were the “Good Ole Days.”

Typed emoticons can still elevate any chat, especially the timeless and hilarious 🙄 emoticon. Here’s how you can type out this shrug emoji on Mac, Windows, iPhone, and Android devices.

## A Quick Guide On How to Type the Shrug Emoji 🙄:

---

### How to Type the Shrug Emoji 🙄 Quickly and Easily

On first glance, the shrug emoticon seems like a tricky and complex emoticon to write out. It’s one of the more intricate emoticons to type, and most people often resort to copying and pasting the emoticon from other websites. One of the more popular ones? Copyshrug.

But copy-pasting the emoticon is only a decent option if you use the emoticon sparingly. If you use the shrug emoticon often, you will need to keep Googling the website to copy and paste, which can be a slow and tedious process – not to mention, annoying. It’s worse if you are on your mobile phone.

Do you want to type the shrug emoticon as quickly as possible? We recommend creating a text replacement shortcut that has your device’s autocorrect feature. With our guide, it only takes about two seconds flat.
