

The ProSource Produce LLC recall of whole raw onions (red, yellow, and white) shipped from Chihuahua, Mexico, between July 1, 2021, and Aug. 31, 2021, for Salmonella contamination is rippling through food chains., including those of home meal delivery services.

This recall comes after more than 650 people have been infected in a [Salmonella Oranienburg outbreak](#) that federal officials say has been traced to the fresh onions from Mexico. The implicated onions originated with ProSource Produce Inc. of Hailey, ID, according to the Food and Drug Administration

al deliery services:

HelloFresh has learned that one of its ingredient suppliers is involved in

the recall of Mexican-grown onions over the potential presence of *salmonella bacteria*. HelloFresh asks that its customers of home-delivered meals discard all onions received from July 7, 2021, through September 8, 2021.

It recommends disposing of onions received during the specified time period. Onions received after September 8, 2021, are not affected by the recall. For further information on whether you have been impacted, please check the product codes, located on the bottom square of your box shipping label..
