

Introducing Software V110

Introducing Software V110

The Tesla Team December 24, 2021

Software Version 11.0 is here as part of our most significant vacation release. Presenting a few of our most imaginative functions, from a brand-new Light Show function that lets you (or anybody with a computer system) choreograph light programs to your own music, to brand-new video games and home entertainment experiences, security functions, personalized controls and a brand new user-

interface style.

This week, Tesla owners around the globe will have the ability to do more with their automobiles, and have much more enjoyable, all with a complimentary, over-the-air software application upgrade.

Here's what's brand-new:

- **Tesla Light Show:** Anybody with a computer system can now develop their own special Tesla Light Show, no Tesla car needed. Utilizing xLights, totally free open-source software application, you can produce a light program to carry out with any music of your option. You can then download your program, or reveals from other developers, onto a USB flash drive and upload it to your vehicle.

Light Show likewise comes pre-loaded with one tune for you to delight in, and deals with all brand-new Model S, brand-new Model X, and any Model 3 or Model Y.

Getting Started Documentation can be discovered here.

- **New User Interface:** Every Model 3 and Model Y, in addition to tradition Model S and Model X fitted with an Intel Atom ® Processor, will get a fresh digital appearance that rollovers style components from our brand-new generation Model S and Model X. Several significant functions consist of an adjustable app launcher, streamlined controls menu and assistance for a dark mode look.
- **Updated Navigation:** Our brand-new navigation permits you to conceal map information for a tidy, streamlined appearance, and you can now include and rapidly reorder several stops on your path. Your Tesla will instantly upgrade arrival times and battery levels at each location.
- **Games:** We've included the initial Sonic the Hedgehog to Tesla Arcade for much more enjoyment and a little bit of fond memories throughout charging stops. You can now likewise offer your brain an exercise with Sudoku, or challenge your good friends with The Battle of Polytopia multiplayer.
- **Entertainment:** TikTok is now offered on the touchscreen and our brand-new Boombox Megaphone permits you to predict your voice through your automobile's external speaker– best for revealing to your buddies when it's time to fill up and go out!
- **Audio:** For an even much better audio experience, there are now 5 levels of Immersive Audio, consisting of an Auto setting that adjusts to the material you're playing, and you can change subwoofer output individually to get simply the correct amount of punch from the bass.
- **Blind Spot Camera:** When signifying to alter lanes or make a turn, a live cam view of your blind area will trigger on your touchscreen.
- **Sentry Mode Live Camera Access:** Already reside in the United States, we're presenting our Sentry Mode Live Camera Access function for the rest of North America and most of Europe. This function permits you to see the live feed from the Autopilot cams straight on your Tesla app.
- **Comfort Suspension when in Autopilot:** For Model S and Model X fitted with adaptive suspension, this brand-new mode instantly changes air suspension to its "Comfort" setting, best

for highway travelling.

- **Cold Weather Improvements:** For much more benefit, cold-weather functions can now be triggered through the Tesla app or center touchscreen at a lower state of charge, permitting you to gain access to functions like cabin preconditioning and heated charge port when you might require them most.

For every Model 3 and Model Y, we've likewise included automated seat heating system performance: first-row seat heating systems will immediately change based upon cabin conditions and environment control settings.

From the business that created the vehicle software application upgrade, Version 11.0 is the most recent example of our efforts to make sure that every Tesla improves gradually. Enjoy it, and delighted vacations!
